ELSEVIER

Respiration Physiology 117 (1999) 195–196

Subject index of volume 117

Acid base
  exercise, tammar wallaby, 41
Afferent fibers
  phrenic, respiratory stimulation, 1
Airways
  closure, 131
  tracheal muscle, 171
Anesthesia
  level, phrenic afferent stimulation, 1

Blood gases
  exercise, tammar wallaby, 41

Carotid body
  chemoreception, nicotine, 29
Control of breathing
  central chemosensitivity, 13
  CO2 response, temperature, brainstem, 97
  hypercapnia, hypoxia, sleep, 109
  Kölliker-Fuse to hypoglossal motoneurons, 85
  phrenic afferent activity, 1
  SIDS, nicotine, 29

Density
  gas, hypoxia, 151
Development
  neonatal lamb, 161
  SIDS, 29
Disease
  SIDS, 29
Diving
  mammal, 59

Endothermy
  dinosaurs, 73
Evolution
  dinosaurs to birds, 73
Exercise
  blood gases, 161
  maximum O2 uptake, dinosaurs, 73
  treadmill hopping, tammar wallaby, 41

Gas exchange
  blood gases, neonatal lamb, 161
Gene
  c-fos, 13

Heart
  mass, intermittent hypoxia, 53
Hematocrit
  intermittent hypoxia, 53
Hypercapnia
  c-fos expression, 13
  metabolic down-regulation, 59
  response, sleep, 109
Hypoxia
  airway obstruction, gas density, 151
  intermittent, hematocrit, right ventricle mass, 53
  metabolic down-regulation, 59
  response, sleep, 109

Impedance
  respiratory, partitioning, 143

Lung
  sounds, 131

Mammals
  cat, 85
  dog, 1
  elephant seal (*Mirounga angustirostris*), 59
  guinea pig, 171
  humans, 109, 141, 151
  lamb, 163
  rat, 13, 29, 53, 97, 121, 131
Marsupial
  tammar wallaby (*Macropus eugenii*), 41
Mechanics of breathing
  airway obstruction, helium breathing, 151
  lung sounds, 131
  thoracic gas volume, respiratory impedance, 141
Metabolism
  dinosaurs, 73
  down-regulation, 59
  exercise, tammar wallaby, 41
Methods
  Brainstem-spinal cord vs. slice, 97
  particle image velocimetry, 181
Muscle
  diaphragm, contractility, vanadate, 121
  smooth, tracheal, relaxation, 171

PII: S0034-5687(99)00078-X

Nerve
recurrent laryngeal, 85
Nucleus
Kölliker-Fuse, 85

Pharmacological agents
cyclopiazonic acid, 171
sodium nitroprusside, 171
terbutaline, 171
vanadate, 121

Receptors
glutamate, 85
Recruitment
lung units, sound, 131
Resistance
airways, gas density, 151
Rhythm generation
temperature, pH, 97

Sleep
apnea, 109
chemical control of respiration, 109
intermittent hypoxia, 53
Sounds
lung, recruitment, 131

Temperature
phrenic activity, in vitro brainstem, 97
Theropoda
dinosaurs, 73
Toxic agents
nicotine, 29
Transmitters
excitatory amino acids, 85

Upper airways
bifurcation, flow simulation, 181

Volume
gas, thoracic, 141

Work of breathing
He breathing, 151
